Training Project - 9 points
Create ROLE with 7 tasks
1 - 5 (copy file 1.txt to host. use loop to print 3 time some message, print os_family of host, create (text)variable and print it)
6 - 8 (
use delegate_to:) (to save host-ip in log.txt on master, reboot host and then save to log.txt the time then host rebooted)

Final Project - 91 points
Create Role what
1.install some packages (htop, tree . . .)
2. update system
3. install Apache/httpd
4. Then copy files to hosts
5. Print how many RedHat and how many Debian(Ubuntu) hosts
   (only 1 time)

Use how many tasks you need. Can use build in modules and if need possible use Shell-Commands

1 month - until 3.3.2024
